

A Message from the WJV President

My fellow residents, once again I have the unfortunate duty to inform you all about another ugly incident by a male resident accosting and verbally abusing another female resident within our community. This time it was a member of our board of directors.

This incident was a manner like the one that occurred just a few months ago by the same individual against another female resident. I feel compelled to notify our residents about this once again. A report has been filed with the sheriff's department and they will monitor this on an ongoing basis.

May I suggest that all residents, especially females, be aware of this sort of demented conduct. I will be looking into u the board of directors can do to try to sanction this individual from doing this in the future within our community. We will not allow this sort of conduct from anyone in our community and everyone should always feel safe and secure no matter who you are. I would strongly recommend that anyone who is treated in a like manner to report it immediately to the police department so they can send an officer down to take a report so it will be on file for further action against the individual if it's appropriate. Two reports have already been filed with the sheriff's office about the same individual and hopefully a **CASE** is being built.

Gus
